

# Highgate High Street

Traffic over the 3 month period from 4 January to 4 April 2026

Highgate High Street, London 04-01-2026 → 04-04-2026

## 24 hour average per direction

- Average of 12,258 vehicles / day
- The device location is south east of the South Grove junction and so does not capture the significant evening flows via Swains Lane, South Grove and northbound into the High Street.
- Traffic volumes are fairly steady between 07.00 and 20.00 though with some increase in the middle of the day between 12.00 to 14.00 and in the afternoon / evening between 16.00 to 19.00.
- The road stands out as having a much higher number of pedestrians from Mondays to Saturdays compared to other streets in our network, with counts at 14% of total movements. Pedestrians peak between 8.00 and 17.00
- However, cars still dominate accounting for 69% of movements.
- Buses account for 3.9% of volumes and light trucks and vans 6.4%.
- Bicycles are 7.3% and motorcycles 1.2%
